ONLINE SAFETY TIPS FOR KIDS – PART 1

Do not Share Personal Information: Avoid sharing your full name, address, phone number, school name, and other personal details with people you do not know in real life.

Use Strong Passwords: Create strong, unique passwords for your online accounts. Avoid using easily guessable information like birthdays or names. Enable Multi-Factor Authentication (MFA) where supported.

Use Privacy Settings: Learn how to use privacy settings on social media platforms and apps. This helps you control who can see your posts and information.

Be Selective About Friends: Only accept friend requests or connections from people you know in real life. Be cautious about adding strangers to your social media accounts. Fake social media profiles are a real thing.

Be Kind Online: Treat others online the way you want to be treated. Avoid cyberbullying, mean comments, or hurtful actions. Remember that words can hurt just like actions in real life.

Think Before You Share: Before posting pictures, videos, or personal information online, think about how it might affect your privacy and reputation. Once something is online, it is almost impossible to remove.

Report suspicious or uncomfortable interactions: It is okay to seek help if you come across something that makes you uncomfortable or worried.
