ONLINE SAFETY TIPS FOR KIDS – PART 2

Avoid Online Strangers: Never meet in person with someone you met online without first getting permission from a parent or guardian. Even then, make sure to meet in a public place with a trusted adult present.

Stay Away From Inappropriate Content: If you come across content that's violent, explicit, or makes you uncomfortable, exit the page immediately and tell a trusted adult about it.

Don't Fall For Scams: Be cautious about offers that sound too good to be true, and never share your personal information, like your password or credit card details, with anyone online.

Report Suspicious Or Uncomfortable Interactions: It is okay to seek help if you come across something that makes you uncomfortable or worried.

Be Careful With Webcams: If you are using a webcam, make sure you know who you are video chatting with. Turn off the webcam when you're not using it to avoid accidental sharing.

Think Before You Share: Before posting pictures, videos, or personal information online, think about how it might affect your privacy and reputation. Once something is online, it is almost impossible to remove.

Ask For Help: If something online makes you uncomfortable or confused, talk to a parent, guardian, teacher, or another trusted adult about it. Before downloading apps, games, or software, ask a parent or guardian for permission. Some things might not be safe or appropriate for your age.
